

ADWOA B. ACHEAMPONG

Business Operations Consultant | AI-Enabled Systems & Executive Strategy

Accra, Ghana (Remote, US-Aligned Hours, GMT) | +233 276 291 485 | cc@acheampong.com | acheampong.com

SUMMARY

Business Operations Consultant for founders and CEOs who've outgrown their own systems. I rebuild what's underneath — financial reporting, staffing infrastructure, digital workflows, and AI-enabled tools. Co-Founder and Owner of a Pan-African holding company spanning manufacturing, digital commerce, and workforce training, alongside hands-on operations consulting and systems architecture for a multi-location automotive business.

CORE COMPETENCIES

Business Systems Design & Operational Infrastructure • Financial & Performance Reporting • AI-Enabled Workflow & Tool Design • Executive & Founder Partnership • Remote & Cross-Functional Team Leadership • Business Scaling Strategy • Process Automation

PROFESSIONAL EXPERIENCE

Business Operations Consultant

Automobiles Ghana Ltd / Stoic Team Ghana — Accra, Ghana

2024 – Present

Direct Partner to Founder/CEO: Bright Botchway

- Architected the AGL OPS Command Center (agl.software), a connected ERP and staff hub with Kanban-based work order tracking, QR-code workspace authentication, and role-based dashboards, replacing fragmented spreadsheet and paper-based operations with real-time, branch-wide visibility
- Directed the operational rebuild of sales, expense, inventory, and attendance systems and trained staff on consistent data capture, giving AGL its first reliable view of real performance: GHS 250,000 in monthly revenue against roughly GHS 10,000 in monthly expenses
- Executed an 8-week marketing turnaround campaign early in the engagement (2024), growing daily revenue from GHS 1,200 to GHS 2,700 (125%)
- Drafted and formalized employment contracts across five operational roles, establishing consistent staffing and compliance structure
- Designed Building AGL, an AR-based mechanic diagnostic concept using goggle-mounted cameras and fault-code data to guide real-time repairs

Co-Founder & Owner

Blkk Legacy Holdings (BLH) — Ghana

2024 – Present

- Co-direct BLH's Pan-African strategic vision alongside CEO Samuel Rogers across manufacturing, digital commerce, workforce training, and community development verticals
- Led full financial and consistency audit and structural rebuild of BLH's 178-page Version 2.2 investor brief, including content architecture and partner profiling for government ministers and DFI audiences
- Authored full-stack build specification for BlkkStarHub, BLH's digital commerce platform (blkkstarhub.com)
- Built Startup World Cup pitch package and capital strategy materials supporting a \$4.44M raise within a \$14.8M total capital structure
- Shaped strategic positioning for BLH's workforce training initiatives, including the 24-month ELEVATE and 10-month CULTIVATE programs

Executive Operations Lead

JonMon-Sacs Ghana Ltd — Remote

2025 – 2026

Direct Partner to CEO: Barry Tariye Ndiomu

- Managed Ghanaian business and property portfolio operations, overseeing regulatory compliance, vendor coordination, and financial documentation
- Represented executive interests across high-trust stakeholder environments

Business Operations Manager

Baa & Bean Café — Remote

2024

Direct Report to CEO/Founder: Sharon Dedo-Azu

- Conducted operational gap analysis across the café chain, identifying structural gaps in sales process and reporting
- Rebuilt sales SOPs chain-wide, driving a 120% revenue increase

- Negotiated and structured a 60% profit-share enterprise agreement
- Managed compliance and stakeholder coordination across international partnerships

ADDITIONAL EXPERIENCE

Executive Assistant to CEO Samuel Benjamin Kofi Arthur, Trident Real Estate Group (2025) — led full-cycle pre-financing research for the 2K Towers development project and built sales/marketing workflows generating qualified pipeline. **Administration Manager & Executive Assistant to CEO Mohammed Abu-Zein, Zein Real Estate / Jamila Group (2023–2024)** — automated reporting and workflows, improving efficiency by 30%

PROJECTS
